The Faculty of Business Administration at Simon Fraser University is dedicated to research and teaching that makes an impact. The Faculty has a deep commitment to the creation and communication of knowledge to improve the performance of individuals, organizations and their communities. We champion lifelong learning, embrace productive change and challenge our students and ourselves to be innovative. We bring the best of research and teaching to the learning experience.

Research is the foundation on which our teaching programs are based. Through research, our faculty develops an understanding of, and is able to improve, administrative practices. Research ties knowledge from the social sciences to administrative reality. Research and education facilitate the development of critical thinking skills in our graduates.

SFU Business is both AACSB and EQUIS accredited, placing us among a select group of business schools. The rigorous external review process of these accreditation bodies confirms the high quality of our academic activities and the international relevance of our programs.

We are very pleased with our growing research strength as a Business School. Much of our success has been due to the incredible research output of our faculty and their ability to integrate this leading edge research into our programs. Our faculty members are thought leaders in areas that will define business in the 21st Century: technology and innovation, sustainability, socially responsible corporate citizenship, financial risk management, corporate governance, and cross-cultural management. Respected around the world, our faculty members use their research skills to advance our understanding of these complex issues while maintaining excellence in their teaching. Through research, faculty members bring the latest ideas into their classrooms ensuring our students benefit from their research activities.

Daniel Shapiro, Ph.D.
Dean
Faulty of Business Administration
